DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
2. The disclosure is objected to because of the following informalities:
 - Page 6, lines 2-3: The sentence is incomplete and unclear.
 - Reference numeral 202 has been used to describe both a lid and chip (see page 6, lines 11, 14).

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-7 and 9-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Mettler et al.

Art Unit: 2839

Mettler (Figures 1-6) shows a waveguide holder having an optical integrated circuit chip (OICC) 10 with a substrate 100 with a structure with a plurality of waveguides 16 disposed in an opening and a lid 150 disposed on the substrate. Mettler also shows another OICC 20 with a substrate 200 with a plurality of waveguides 26 in an opening and a lid 250 adhesively mounted on the substrate wherein an edge of the lid and the substrate define a depression on one side and similar one on the other side at the ends of the waveguides. Mettler further shows another cover 300 with alignment recesses 33 and positioning members 25 disposed in the alignment recesses.

5. Claims 8 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Nakamura et al.

Nakamura (Figures 1-19) shows a waveguide holder having a substrate 60 with a structure with a plurality of waveguides 57 disposed in an opening. The substrate has a plurality of recesses 59 and a lid 62 with complimentary recesses 63 and positioning members 61 disposed in the recesses. An edge of the lid and the substrate define a depression on one side and similar one on the other side at the ends of the waveguides.

6. Claim 12 is rejected under 35 U.S.C. 102(b) as being anticipated by Watanabe.

Watanabe (Figures 1-7) shows a waveguide holder with a substrate 51 with a plurality of waveguides disposed therein and a lid 52 disposed on the waveguides wherein the lid has overhangs on at least two sides, which form depression with edges of the substrate.
